

# The 25<sup>th</sup> Hands-on Exercise for International Students

## Assembly/Disassembly of Internal Combustion Engine

13:00-17:00, July 10, 2023 at Creation Plaza

Number of the participants... 14 students ( 7: JUACEP, 7: TA)

Countries of the participants... Belgium, Democratic Republic of the Congo, Canada, USA, France, Morocco

Lecture

Assembly & Disassembly

Performance Test

Jet engine Demonstration

Very interesting and educational. The staff (technical + administrative) is very friendly, patient and competent.

I really enjoyed this workshop!

It was very enjoyable! It's a nice change in the routine and we get to see experiments we don't see every day. Thank you!

The workshop was beyond my expectations and the staffs were extremely patient and helpful. Our instructor took time to explain every piece in details and the outdoor experience was interesting. Chapeau bas!

Thank you! I really liked that we were able to test our engines at the end. Maybe it could be interesting to have a bit more autonomy in the assembly/disassembly, it could have been interesting to have to use the instruction manual and figure out how to assemble back the engine ourselves with supervision.

A nice experience, I'm glad that I could have seen a jet engine working.

The hands-on workshop was a fantastic opportunity to apply theoretical knowledge and gain practical skills in manufacturing. The instructors were knowledgeable and supportive, and the workshop was well-organized. The availability of suitable equipment ensured a smooth learning experience. Overall, it was an enriching and enjoyable workshop.
